As can be seen above, there are several small sample sizes (less than 70 people) from several SDs and SSDs and in some cases very small sample sizes (less than 30 people).

We recommend caution with regard to interpretation of data from such SDs and SSDs. The SDs and SSDs of most concern were:

NSW SDs: Far West NSW.

QLD SDs: South West QLD, Central West QLD.

Brisbane SSDs: Beaudesert Shire Part A, Redcliffe City.

To address these concerns the data from those SDs and SSDs have been merged in this website with contiguous geo-units in order to maintain more robust samples. This has been done for:

QLD SDs

1. Merge North West QLD/ Central West QLD/ South West QLD. Total sample size = 42 people. OR 3 of the following options:
2. Merge Darling Downs/ South West QLD. Total sample size= 86 people. OR
3. Merge Central West QLD/ Fitzroy. Total sample size= 113 people.
4. Merge North West QLD/ Northern QLD. Total sample size= 164 people. OR
5. Merge North West QLD/ Far North QLD. Total sample size= 106 people.

NSW SDs

1. Merge Murray/ Far West NSW. Total sample size= 84 people. OR
2. Merge Far West NSW/ North West NSW. Total sample size= 121 people.

Brisbane

1. Merge Gold Coast Parts A and B. Total sample size= 222 people. OR leave separate
2. Merge Ipswich/Beaudesert. Total sample size= 70 people.
3. Merge Logan/Redland. Total sample size= 177 people.
4. Merge Caboolture/ Pine Rivers/Redcliffe. Total sample size= 103 people. OR options 5 & 6.
5. Merge Caboolture/Redcliffe. Total sample size= 59 people.
6. Merge Pine Rivers/Redcliffe. Total sample size= 64 people.

If there is any other options that should be considered for addressing small sample sizes in some SDs and SSDs, please do not hesitate to put forward your suggestions.
